GO BEYOND

All diagnostic and programming functions now available at Mechanics For Africa, Ndola, using state-of-the-art dedicated **Land Rover** Electronic Diagnostic Equipment.

Including Fault Finding; ABS, SLABS and Air Suspension Calibration; Key Programming; ECU and Component Programming; Module Programming etc.

All models covered; Defender, Freelander, Discovery, and Range Rover, both Petrol and Diesel.

ALSO AVAILABLE: **Performance Tunes** for all models with Flash-Programmable ECUs. These **Performance Tunes** increase power and torque output, whilst improving fuel efficiency at the same time!! We tried this on our TD5, and the results were astounding!

Contact us for Power/Torque curves and further information.

We can also perform diagnostic tests on other vehicles, including Toyota, Nissan etc. and offer full workshop servicing and repair work on all models.
